#MeToo Harassment Study 2024

Conducted for: Tulane University of Louisiana /
University of California – San Diego

Conducted by: NORC at the University of Chicago

Sample Source: AmeriSpeak Probability-Based Panel and non-
probability panel respondents, calibrated using TrueNorth

Sampled Population: General population 18+

Date Fielded: April 24 – May 17, 2024

*This survey was in Spanish and English, but only the English is represented here. AmeriSpeak's standardized introduction and thank you informational screens are not included below. Finally, this is a TrueNorth survey that included non-probability panelists. These non-probability panelists were asked a series of demographic profile questions that were not asked of AmeriSpeak panelists because that information was already on file. This demographic profile questions asked only of non-probability panelists are also not included here. At the end of the document, all of the demographic, socio-economic and household profile measures that have been asked of AmeriSpeak prior to the survey and included with the final delivered data are noted.

WINTRO_1.

Hello, thank you for agreeing to participate in our new AmeriSpeak survey!

This survey is about harassment, domestic violence, and abuse.

If you are experiencing distress or discomfort, online and telephone resources are available here:

<https://www.rainn.org/resources>.

INTRO.

This survey is being conducted on behalf of Newcomb Institute at Tulane University, an academic research institute focused on gender issues. We will ask you about your experiences with harassment and violence in public spaces, as well as in private spaces like your home. We will ask some sensitive questions like participation in illegal activities as well as personal, potentially traumatizing life events that could lead to emotional distress. Difficulties in life, including harassment and violence, can happen to anyone. While taking this survey, please think about all the experiences you have dealt with in your life regarding these specific situations, as well as how experiences like this have affected you. Your answers to the questions will be kept strictly confidential.

To further protect the privacy of participants in this study, NORC has obtained a Certificate of Confidentiality. This information is available to AmeriSpeak panelists at: <https://www.amerispeak.org/privacy>. NORC can use this Certificate to legally refuse to disclose information that may identify you or your minor child in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings, for example, if there is a court subpoena. NORC will use the Certificate to resist any demands for information that would identify you, except as explained below.

The Certificate of Confidentiality does not prevent disclosure to state or local authorities of child abuse and neglect, or threats to self-harm or to harm others.

If you have any questions or concerns about this study, you can contact AmeriSpeak support at support@AmeriSpeak.org or call (888) 326-9424.

The survey will take approximately 15 minutes, on average. Since some of the questions are personal, we suggest that you be in a private setting during the survey.

There are minimal benefits or risks to being in this voluntary study. In order to keep your information private, the answers you give us will be combined with the answers from other people who are in the survey. No information that could personally identify you will be given to our organization or anyone else. You can skip any question or stop the survey at any time.

The information from the survey will help advocates, policymakers and educators better understand how to address these issues and make communities safer for everyone. Your help matters, and it will make a difference.

Do you agree to participate in this survey?
